### Water Confidence Building

UKSA offers bespoke programmes designed to build confidence and encourage teamwork using watersports and the great outdoors as a catalyst for positive outcomes.

Young people of all abilities are offered a range of activities to learn skills for life in an aspirational and safe environment.

### Inclusive and Welcoming

UKSA are inclusive in every meaning of the word. They involve everybody, whether they have physical challenges or emotional difficulties to overcome, or they are high achievers looking for the ultimate challenge.

Focusing on the individual, huge importance is placed on personal development - whether that's encouraging a nervous student to dip their toes in the water or helping an older student develop their CV for a career in the superyacht industry.

### Choice of Programmes

UKSA's outdoor activity centre provides guests with plenty of water-based outdoor programmes which give students the chance to try a combination of different disciplines to call upon a variety of personal and team skills.

They are encouraged to aspire and achieve - and have great fun realising what they can do both individually and together.

Typical activities include dinghy sailing, windsurfing, kayaking, stand-up paddleboarding and keelboating.
