

Net Zero Policy

Version 1.0 January 2025

Education Destination Ltd. is a tour operator specialising in the provision of bespoke, curriculum-relevant school trips.

Policy Objective

To achieve net zero greenhouse gas (GHG) emissions across all operations by 2050, with an interim goal of reducing emissions by 50% by 2030, starting from the 2020 baseline.

Our Commitments

Carbon Reduction Targets

- We commit to achieving a 50% reduction in GHG emissions by 2030 and reaching net zero emissions by 2050

Energy Efficiency

- Implement energy-saving practices and technologies
- Conduct regular energy audits and upgrade equipment to enhance efficiency

Renewable Energy

- Expand the use of renewable energy sources, including solar power
- Increase solar panel installations on company premises

Sustainable Supply Chain

- Collaborate with suppliers committed to sustainability practices
- Promote the use of eco-friendly materials and reduce packaging waste

Waste Management

- Enhance recycling and waste reduction programmes
- Aim for zero waste to landfill by 2030

Sustainable Transport

- Utilise electric vehicles powered by reusable energy solutions
- Optimise routes to minimise fuel consumption and emissions

Community and Employee Engagement

- Engage employees in sustainability initiatives through training and participation
- Support local community initiatives and educational programs on sustainability

company number 09028634

VAT registration no. 201 8378 28

Monitoring and Reporting

- Regularly monitor progress toward net zero targets
- Provide transparent reporting on sustainability efforts and milestones

Implementation

Short-term Actions (2025-2030)

- Conduct a baseline emissions assessment and establish reduction targets
- Implement immediate energy-saving measures and increase renewable energy use
- Begin transition to electric vehicle fleets
- Engage suppliers in sustainable practices

Responsibility

Jon Carter – Managing Director
